Inorder for the EA to work properly navigate to Tools -->
Options --> Expert Advisors. There:
1. Allow algorithmic trading has to be checked
2. Allow DLL imports also checked. It uses only
user32.dll.
3. Allow WebRequest for listed URL also checked.
4. In the last box shown below please add
https://fxnewsguard.com

Then select any chart in MT4 and attach FXNewsGuardMT4 by clicking it in the navigator. Make sure to check "Allow DLL imports", "Allow import of external experts" (not absolutely necessary, please verify) and "Allow live trading"

Please enter the license key provided after purchase

The UseNewsFilter option has to be set to true if you want to toggle the algotrading for news. If it is false, the EA will function like a regular algotrading scheduler for the defined time slots.

block N minutes BEFORE a news time sets in minutes the time before a news event during which the AutoTrading is turned off. block N minutes AFTER a news time does the same for the defined minutes after a news event has passed.

0 = low, 1 = medium, 2 = high defines the type of news for which the news filter is applied for. For example, if 2 is selected then the algotrading is turned off during the embargo period only for high impact news!.

don't spam server checks the calendar in secs. The calendar doesn't change! so please dont spam the server continously. ideally set it at 3000 or higher!

Normally this EA cares only about the news connected with the currencies of the chart on which it is loaded, for example for EURUSD it will toggle for the concerned news from the USA and EUR regions for the concerned impact and toggle the autotrading buton as instructed. If you want it to toggle for currencies other than that of the chart please add them as shown below separated by a comma. CloseTradesBeforeEmbargo will close all trades before toggling the AutoTrading buton to off.

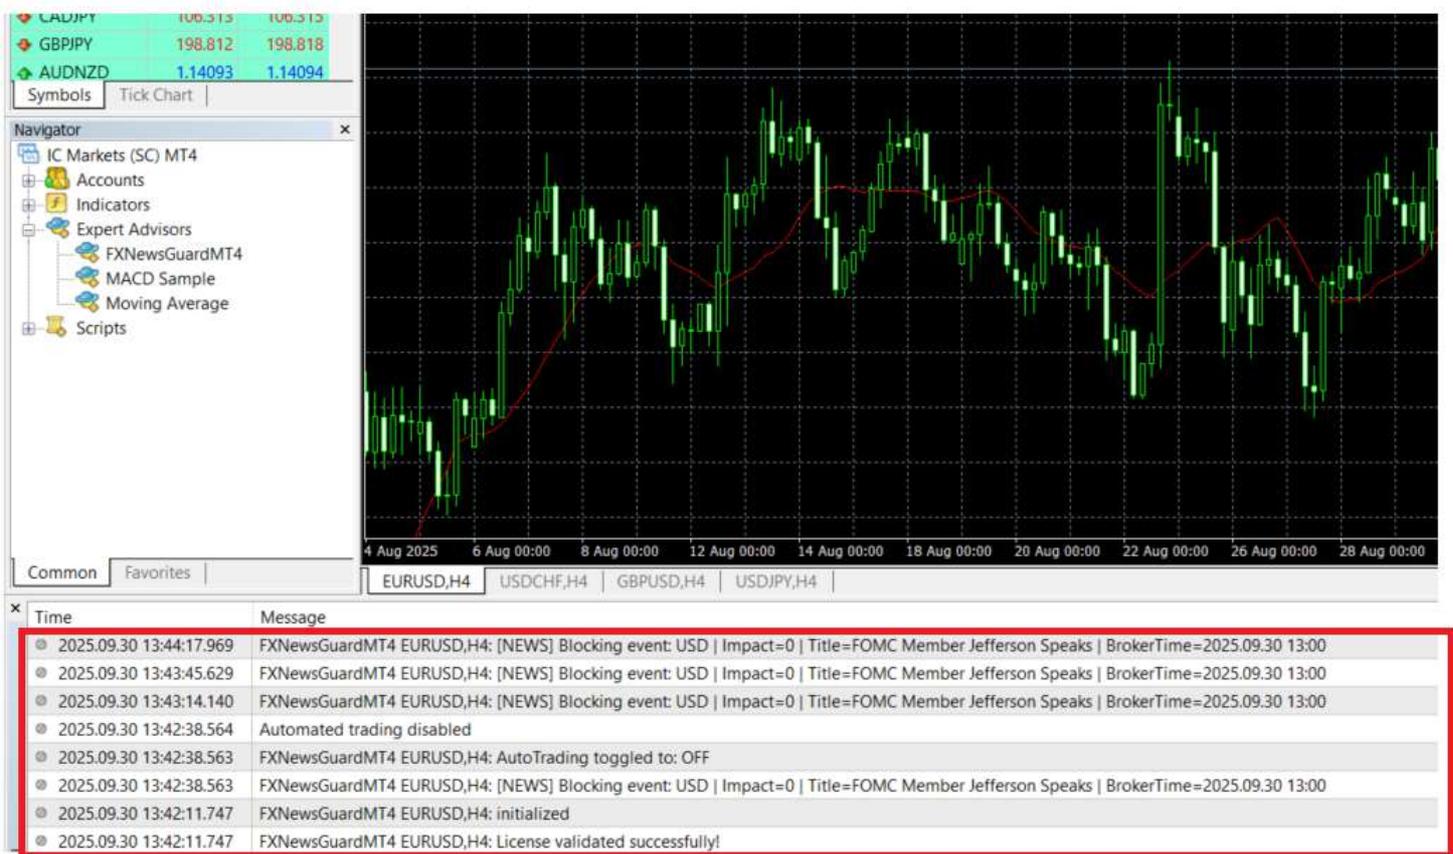

LogToFile will save the actions of the EA in MQL4\Files. This can be accessed by following the path after going to opendatafolder in files tab of your MT4.

You can also see in the experts tab the actions taken by the EA as shown below

Disclaimer

Not Investment Advice.
FXNewsGuard is a software tool. It does not provide financial, investment, or trading advice. Users are fully responsible for their own trading decisions.

No Guarantee of Profit.
Using FXNewsGuard does not guarantee profits or prevent losses. Trading financial instruments carries inherent risks, and past performance does not indicate future results.

Market Risks.
High-impact news can create extreme volatility, slippage, widened spreads, or execution delays. FXNewsGuard cannot eliminate these risks, only manage autotrading toggling around news.

Execution Limitations.
The EA may fail to close or block trades if internet connection, VPS, broker server, or MetaTrader terminal encounters disruptions.

Prop Firm Rules.
While FXNewsGuard is designed to assist with prop firm compliance, it is the user's responsibility to ensure their strategy fully adheres to the firm's specific rules.

No Liability.
The developer of FXNewsGuard assumes no responsibility for financial losses, missed opportunities, or account breaches resulting from use of the software.

Technical Requirements. Proper functioning requires:
DLL imports enabled (user32.dll).
WebRequest enabled (for license verification, if applicable).

User Responsibility.
By using FXNewsGuard, you acknowledge that you understand the risks of trading and accept full responsibility for your results.
